ABOUT PELLE

PELLE was formed in 2011 by Jean & Oliver Pelle who met at the Yale University School of Architecture. PELLE's work combines the unique visions of its founders, interweaving an aesthetic of man-made craft with one of delicate, organic forms to create a multi-faceted collection of works united by a reverence for technical mastery and innovation.

Pulling from Jean's background as the daughter of a sculptor and Oliver's upbringing as the son of a structural engineer, the studio draws inspiration from nature, various historic art movements, and other cultural sources but also geometry and mathematics; resulting in distilled and timeless concepts that defy categorization while remaining aesthetically decipherable and functional. Notable, ever-evolving collections include the now iconic Bubble Chandeliers as well as their acclaimed sculptural, cast-cotton lighting series called the Lure.

PELLE's expansive and historical Red Hook, Brooklyn workshop incorporates a lighting fabrication facility, a dedicated gallery space, and a research studio that allows the duo to continuously ideate.

PELLE has exhibited at Design Miami/ Curio, Salone del Mobile in Milan, the Museum of Modern Art (MoMA), and as part of the Denver Art Museum's thematic Biophilia show in 2024. Jean and Oliver Pelle have been included in Wallpaper* Magazine's USA 300 (2023) and USA 400 (2024) lists of creatives shaping America. PELLE has garnered numerous accolades including the 2018 Best Lighting Award from the International Contemporary Furniture Fair (ICFF). The studio's work has been featured in worldwide trade and consumer publications such as The New York Times, Architectural Digest, Elle Décor, Galerie Magazine, The World of Interiors, and Vogue.

Lighting Fabrication

SHOWROOM GALLERY

The PELLE Showroom Gallery is where the different facets of the practice's ever-refined made-to-order designs and fresh explorations come together. The carefully curated exhibition space features an evolving display of luminaires, furniture pieces, accessories, and paintings, demonstrating how they might be introduced within different types of environments.

Visitors can experience the objecthood of each piece in person: physically engage with the texture of the cast cotton implemented in the Lure lighting collection, the detail that went into the hand-painted landscape panels of the Carrizo Picture Cabinet, or the exact proportioning of the Helm Collection.

Located within PELLE's Brooklyn workshop, the Showroom Gallery retains the idiosyncratic industrial character of the historic building rather than a conventional white cube.

Though regularly programmed with an impromptu rotation of concepts currently in development or those designs being reimaged, the Showroom Gallery is also used to host special thematic exhibitions during events like NYCxDesign each May, when PELLE debuts new collections.

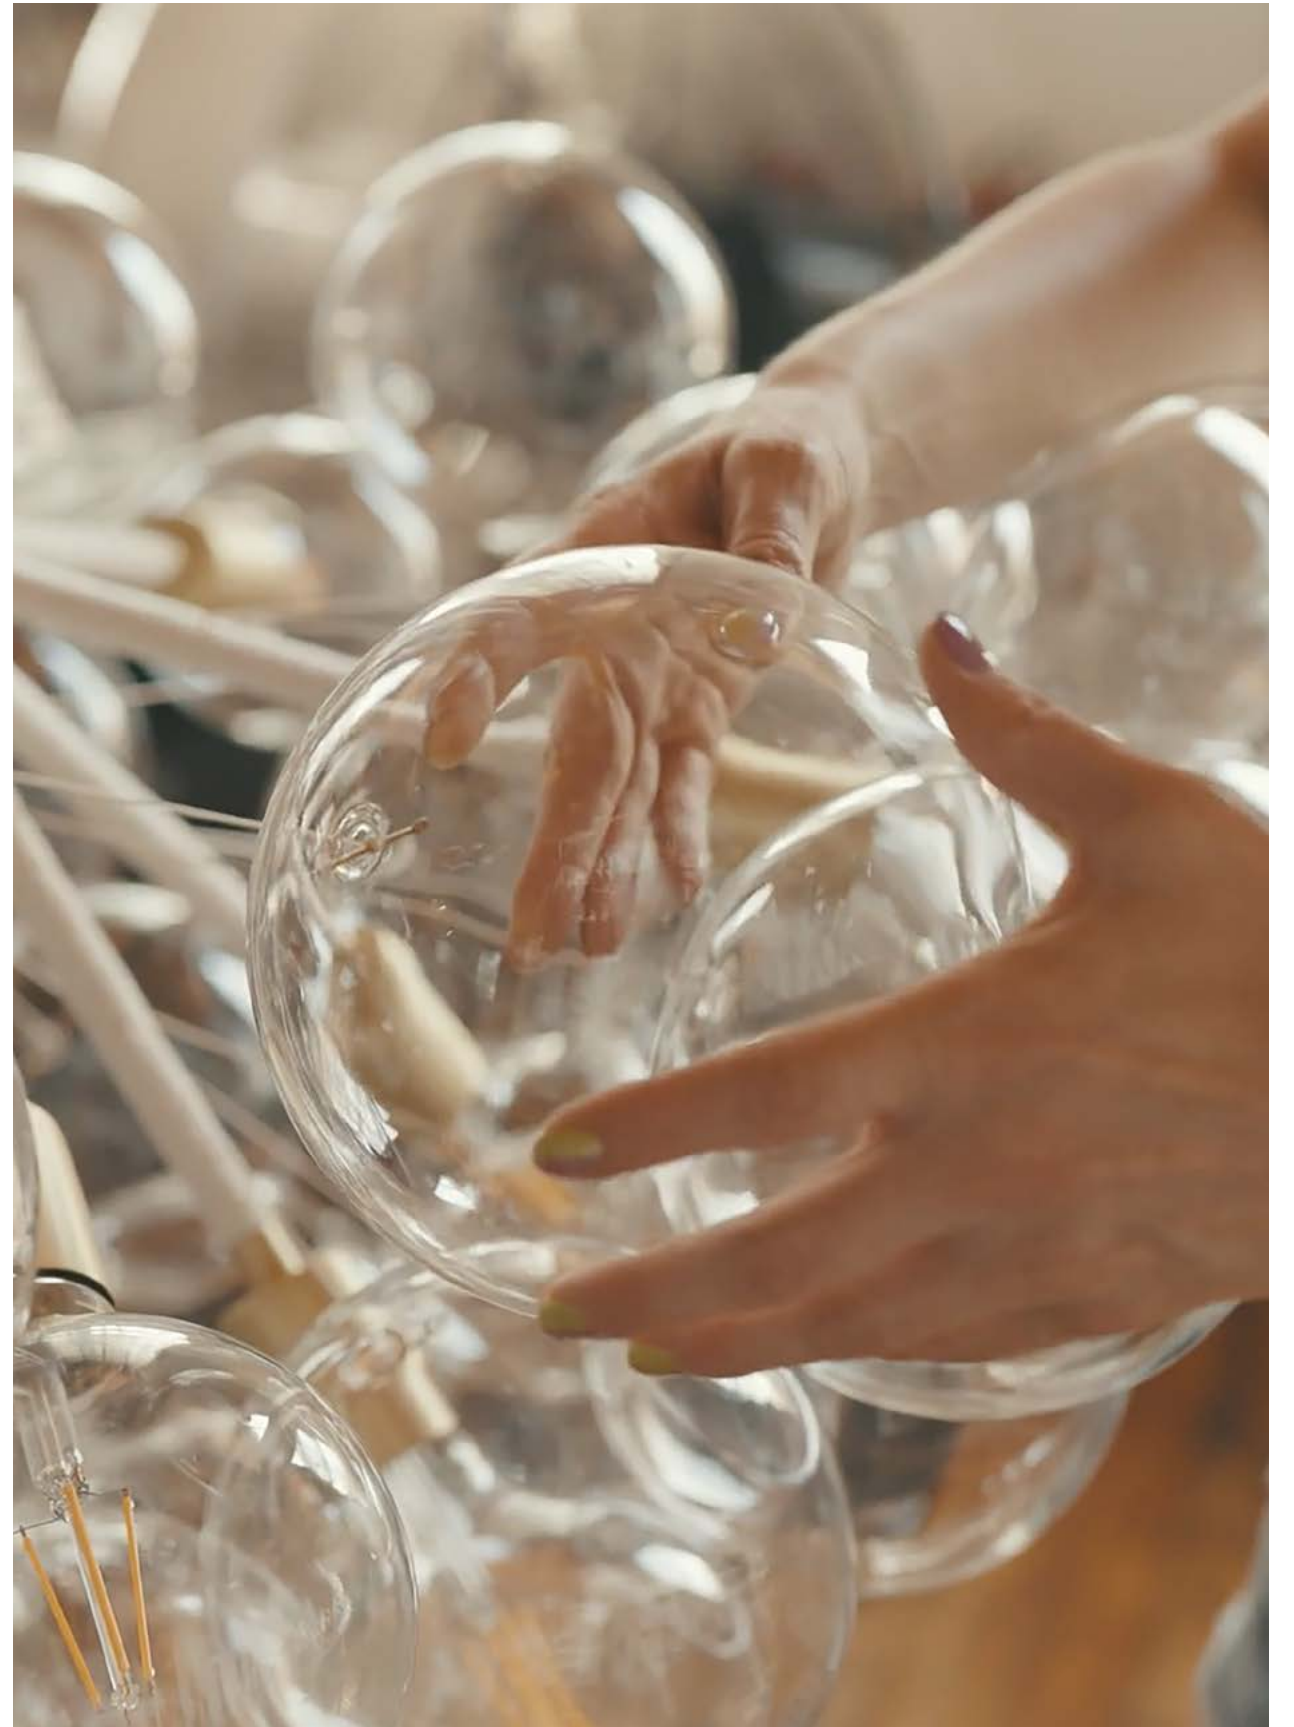

MADE TO ORDER IN BROOKLYN, NY

As many of PELLE's luminaires are hand-made and assembled on site in Brooklyn, they are made to order based on a client's specific requirements. Certain designs can be customized with different aesthetic elements and others, fitted with varying technical components for custom variations.

While Bubble Chandeliers can be produced with different metal finishes and decorative coiling options—as well as clear, hand painted, or gilded globes—the Lure Chandeliers can be composed in innumerable ways and in close collaboration with the client. The underlying concept can be adapted to different spatial specifications, types of mounts, and proportions. Many of the collections can be configured in different compositions, whether that be more organic, streamlined, or rectilinear.

PELLE's affinity for craft centers on the carefully calibrated combination of creative freedom and rigorous engineering, ensuring that the studio's made to order designs are still functional and conducive to varying needs all while maintaining the integrity of the studio's artistic expression and conceptual development.

LIGHTING

LURE

Lure began as an idea to capture the alluring qualities of a white flower observed in nature. This blossom, with its delicate texture and structural grace, reflected light in a way that inspired the creation of a light source evoking the soft glow seen in a dark garden.

This simple observation led our studio to develop a proprietary cast-cotton papermaking process that began in 2015 and continues to this day. Our method of making the Lure resulted in a sculptural material that can be meticulously hand-formed and hand-painted to represent naturalistic forms. Still, Lure is and has always been, more than the replication of plant forms; Lure embodies the idea of translation, the motivating force behind the design of all Lure works.

The white flower shifts in scale and becomes magnified; the banana frond begins as a colorful botanical illustration, then “comes to life”; the willowy patterns on trees are deepened and abstracted, as if shaped by wind and sun; a weed tree is observed, its branches and leaves held mid-air like outstretched limbs and fingers in a dance...a poised moment suspended in time.

Since 2015, the Lure collection has evolved from a single white blossom into a series of botanical chandeliers, pendants, and wall lamps. These include the Nana Lure, Lure Radiata, and Lure Lanterns, among other variations. Lure works have been featured in museum exhibitions and have been acquired for private art collections around the world.

Lure Radiata leaves during the coloring process.

NANA LURE

The Nana Lure's distinctive frond is crafted with cast-cotton that is hand-formed and assembled in the Pelle studio. Each sculptural frond is uniquely made, and its surfaces are painstakingly colored and hand-painted. No two lamps are exactly alike. The cotton fibers used are archival in quality, exceptionally durable, and historically known to last for over one hundred years.

BUBBLE CHANDELIER

Ethereal and iconic, the Bubble Chandelier is a modern re-interpretation of the crystal chandelier. Its luminous constellation of delicate glass globes adds beauty and depth to any interior environment. Each chandelier is handcrafted to order in PELLE's Brooklyn-based studio. The airy bubbles are anchored by precision-tooled hardware, finished to a fine quality. The light's decorative coiling, available in natural cotton and leather cord, is meticulously done by a practiced hand. Each chandelier design is available with upgrades, including 24-karat gold or silver leaf as well as hand-painted glass globes, custom metal finished hardware and decorative coiled leather in a variety of colors.

Supra Bubble Chandelier
Shown with Louise Cabinet, Egsu Dining Table and Fin Chairs

DESIGNED IN 2008

The Original Bubble Chandelier,
first designed by Jean Pelle in 2008,
sparked a series of twelve
distinctive variations.

BE PATIENT

In an age of the instantaneous where images have become accepted placeholders for real things, Be Patient is a call for an attentive appreciation of the physical.

Spanning over six feet in length, Be Patient’s scale lends it an anthropomorphic quality, establishing a physical presence that puts it in dialogue with its space and occupants. Be Patient is a lasting object that will develop and deepen, revealing its nuances over time. The hand-polished aluminum exterior subtly reflects the surroundings while a beam of light beneath pulls the eye upwards. Hidden within, the delicate intricacies of a central blade and baffles diffuse light.

By offering a point of reference, Be Patient asserts the importance of the physical objects around us not merely as accessories, but as companions, and as reflections of ourselves.

DUST

An expansive and kinetic light installation composed of reflective shards, Dust isolates and explores the transitory moment of a breaking mirror.

Fragmented shapes are suspended in an arrangement of lit and mirrored surfaces to create an immersive experience of particles dispersed and floating. Each shape is at once random and immediately recognizable, echoing the unlikely patterns observed in shattered forms.

Dust mimics the effect of moving and twinkling dust particles carried in the air.

HELM

Hard angles and crude geometries permeate our everyday environment – metal ductwork, roof eave lines, industrial machinery – stolid forms that create a utilitarian landscape that we inhabit without choice but become familiar with. We have absorbed the utility to the point where they become sculptures. The Helm lighting series are metal formworks with bold presence, built of heavy aluminum plates and expressive welded joinery.

HELM OBLIQUE

Featuring distinct oblique angles and seamless corners, these pieces retain the sculptural essence of the originals while embracing a more polished refinement.

BEAM AND GLOW

The Beam and Glow Collection is a series of vertical and horizontal light structures that combine vibrant colors with formal abstraction to create an immersive lighting experience.

Inspired by the pure expressions of ‘objecthood’ found in the Minimal Art movement, the Beam and Glow Collection explores the nature of color, light, scale and context. Each light features an optical-grade resin lens framed by bent aluminum panels that have been anodized or stained with a hand-applied finish. The singular line of the lens is echoed in the simple rectangular frame, conjoining clarity of form with a soft and expansive colored light to create an impactful, yet unobtrusive, environment.

The amber and rose lens colors draw inspiration from the diffusion of city lights — each hue has an enveloping depth that is at once soothing and contemplative.

Beam 06 Sconce and Beam 02 Sconce
Shown in Anodized Silver with Rose lens

Beam and Glow is available in a variety of sizes and can be wall-mounted, flush-mounted or ceiling-suspended as a double-sided pendant.

Beam has a deeper profile and crisp edges

Glow has a wider, more shallow profile and rounded edges

CHANNEL

The inspiration behind CHANNEL was a need for a ceiling fixture that could properly illuminate table surfaces, as well as brighten overall rooms. Channel's design is an elegant, but powerful lighting solution, that could be repeated throughout a larger space. The Channel's all-aluminum body holds a pair of upward-facing, as well as a pair of downward-directed beams, for a total of four lighting components. The sleek aluminum body is suspended by two thin steel cables that double as power conduits.

INCISE

The Incise Paintings introduce lighting into the context of a canvas to create a provocative objet d'art. The paintings inset pearlescent lights within apertures in a painted canvas, illuminating the textured layers of the surrounding surface to create an expansive field of light. Drawing comparisons to Lucio Fontana's technique of deliberately cutting into his canvases to reveal unseen spaces, the Incise Paintings bring an imaginative approach to lighting, offering a new perspective on its expressive possibilities.

PRIS

Pris is a slim, sleek lighting system with a futuristic feel. Named after the fembot character in the neo-noir film, Blade Runner, Pris is available in a series of configurations ranging from simple sconces to multi-dimensional chandeliers. Every fixture is an arrangement of machined linear arms, inset with LED light sources. These beams of light, joined by jewel-shaped connectors, are the defining elements of the Pris system. The double-sided LEDs create an immersive environment with warm light. Impeccably stylish, Pris creates an expandable language of visual geometries.

STEM SHADE

Distinguished by its simple silhouette, the Stem Shade is an ode to lighting's essential elements. A minimal brass shade hangs suspended from a singular stem. Decorative leather coiling accentuates the fixture's pure, clean lines. Available as a pendant that hangs directly from the ceiling, or as a wall-mounted scone, the Stem Shade lends a quiet elegance to any room. Designed to enhance without overwhelming, the Stem Shade provides a sophisticated background presence.

TRIPP

The Tripp lighting line combines the grounded stability of a strict geometric form with the radial energy of a spiral's expansive movement. Crafted from minimal materials to create an ultra-sleek design, the Tripp light extrapolates a classic three-sided shape. Panels placed at angles reflect and diffuse, emanating light outwards through apertures. This dynamic architecture creates prismatic patterns that play softly across a room's surfaces. Evoking a sense of the infinitely circling galaxy, the Tripp lighting line embodies a triangulation of strength, energy and essential form.

LIT PAINTINGS

The Lit Paintings stem from a childhood fascination: memories of the setting sun, the distant yet intimate moon, and skies awash in vivid color. For us, the sun, moon, and sky resonate as primal, ancient ways of experiencing light.

Just as physical materials - wood, metal, or stone - can evoke a tactile or emotional response, so too can a picture, through its portrayal of light, depth, and color.

With the Lit Paintings, we set out to create works of light that merge painting, imagery, and illumination. Each piece features an original oil pastel painting by Jean Pelle, encased in a bronze frame and gently illuminated by miniature LED optics to enhance its presence.

FURNITURE

SCHEMA TABLES

The Schema Tables are a study on conformity and eccentricity. Inscribed within nine squares, each table undergoes a unique and irregular transformation, executed with surgical precision. Polished Nero Marquina marble squares are excised; hand-finished stainless steel planes resectioned—to resist their orthogonal outlines. To heighten the juxtaposition of order and disorder, the stone and steel are altered together and independently to create nine, layered rebellious compositions.

CARRIZO PICTURE CABINET

The Carrizo Picture Cabinet is a unique-edition oak cabinet that blends fine art with functional design. At the heart of the Carrizo Picture Cabinet are a pair of cabinet doors featuring original landscape artwork by Jean Pelle. The doors are paneled with a 48" x 48" tiled oil pastel drawing that captures the Carrizo Plain in central California—a remote, expansive preserve known for its stunning natural light and undulating topography.

The landscape artwork is not only an aesthetic centerpiece but also an integral part of the cabinet's design. Using a distinctive technique in which oil pastels are thickly applied directly onto wood board panels, Jean created a process of layering and scratching away at the surface in which colors are gradually revealed, resulting in a textured effect that invites viewers to engage with the work in a tactile and intimate way.

QUADRAT ARMCHAIR

The grid has always been a fascination. Pelle revisits it once again in an upholstered oak armchair for the Quadrat collection, one of the studio's earliest furniture series. A study of proportion and constraints, the Quadrat Armchair is an interplay of hard and soft lines, both informed by exactitude and ease.

DVN TABLE

The DVN Table is crafted from a single material that is precision milled to achieve a perfect balance.

Alluding to traditional Japanese carpentry where complex joinery techniques are used to build structures without using nails or fasteners, each DVN Table is made from solid aluminum that is meticulously milled down to 1/1000 of an inch to create three curved supports that seamlessly connect with a circular tabletop. The surface is then hand-finished using a non-directional technique that amplifies the continuity of the design.

The DVN Table combines simplicity of material with a sophistication of craftsmanship to create a unified form.

1X2X3 FURNITURE

1x2x3 Furniture transforms linework into material. The profusion of lines – they multiply, repeat, turn, and intersect – puzzling together into a meticulous construction of solid teak wood furniture. A sculptural pair of distinct armchairs and a bench—each piece durable for indoor and outdoor use—embody functional form as visual language.

LOUISE COLLECTION

Inspired by Louise Bourgeois’ ‘Cell’ sculptures, which she describes as dealing “with the pleasure of the voyeur, the thrill of looking and being looked at,” the Louise collection is designed to at once enclose and reveal. The viewer is prompted to look within, through the perforations of the expanded metal frame, to the pair of ebonized oak display shelves perched inside. Two hinged doors open the cabinet, featuring contrasting handles crafted from solid brass. At the bottom of the cabinet, a raised metal plinth serves as a display shelf, and below, the two front legs subtly transition from blackened steel to raw steel to polished brass, supporting the cabinet with a playful inward turn of the legs, and a touch of glimmer that echoes the brass detailing of the handles above.

FIN CHAIR

The Fin Chair is a mahogany and blackened steel chair that features a broad “fin” as its central detail. The structural frame, seat and silhouette of the chair offer an unusual combination of elements, joining the austerity of a simple steel frame with the warmth of premium wood. The seat is made of a solid mahogany that is polished and symmetrically joined, the grain of the wood drawing the eye towards the anchoring fin—crafted from matching mahogany. Juxtaposing this rich material with a minimal frame, the Fin Chair brings singularity to a functional design.
